Connecting to the Newman Senior Technical College wireless network
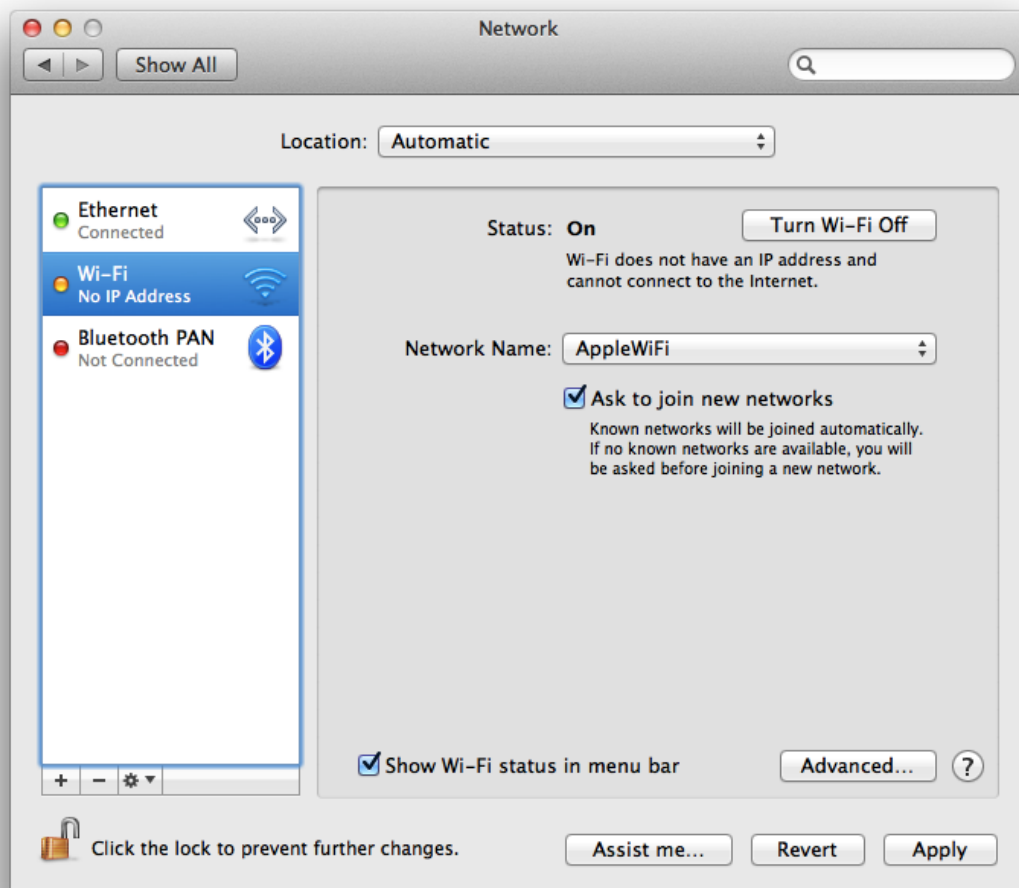

1. Make sure that Wi-Fi is on.

   Mac OS X allows you to turn your Wi-Fi (AirPort) card off entirely in case you do not wish to use it. Sometimes, the Wi-Fi card may be turned off accidentally. If your Wi-Fi interface is on and connected to a Wi-Fi network, the Wi-Fi menu will be bold. The Wi-Fi menu is in the top right corner of the screen.

   If your menu looks like the one above, then your computer is connected to a Wi-Fi network. Move to step 2 below.

   If Wi-Fi is off, choose **Turn Wi-Fi On** from the menu.

   Note: If the icon does not appear in the menu bar at all, then choose **System Preferences** from the **Apple** menu. Click the Network icon, then select Wi-Fi. Check the box next to "Show Wi-Fi status in menu bar."

2. Click on the wireless icon you should see a drop down menu select **nstc wireless**

If your Wi-Fi network is secured using your Newman userid and password.
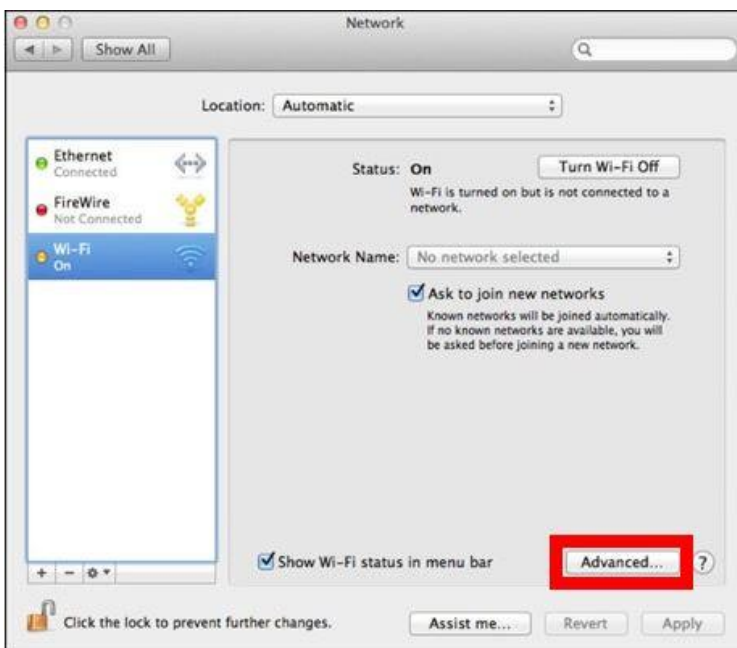

For example
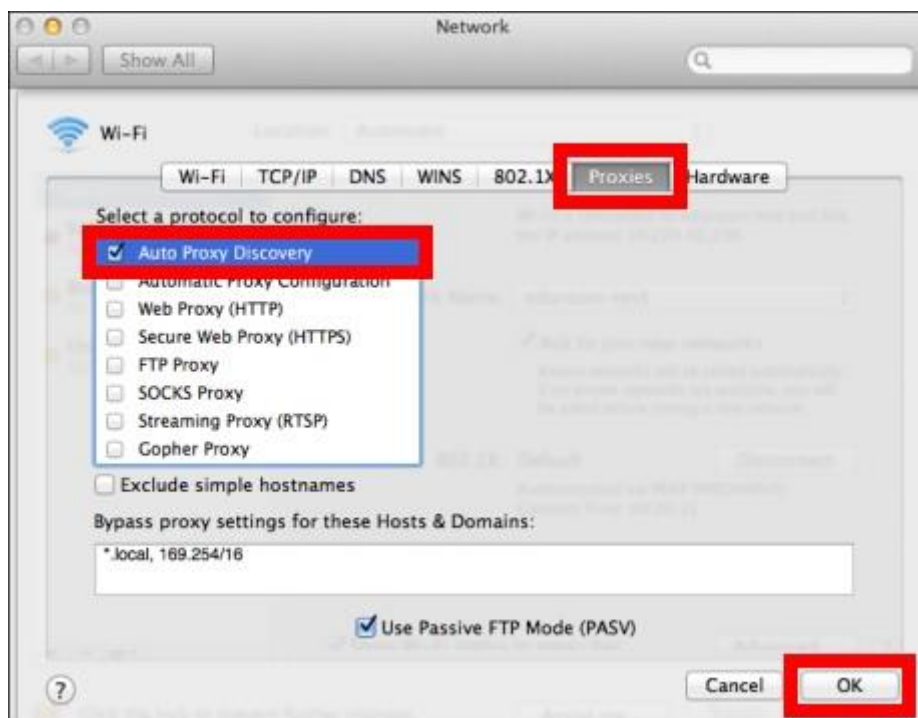

Userid = student.54

password = 12345

Newman Senior Technical College uses a proxy server; you will need to specify a proxy.

Open network preferences and click the advanced button.

Click on proxies and tick auto proxy discovery, click ok and apply.

1. Select **Auto Proxy Discovery** to automatically discover proxy servers and click OK.
